

CONNECTING THE DOTS:

Enabling a *caring* community to become a *compassionate* community

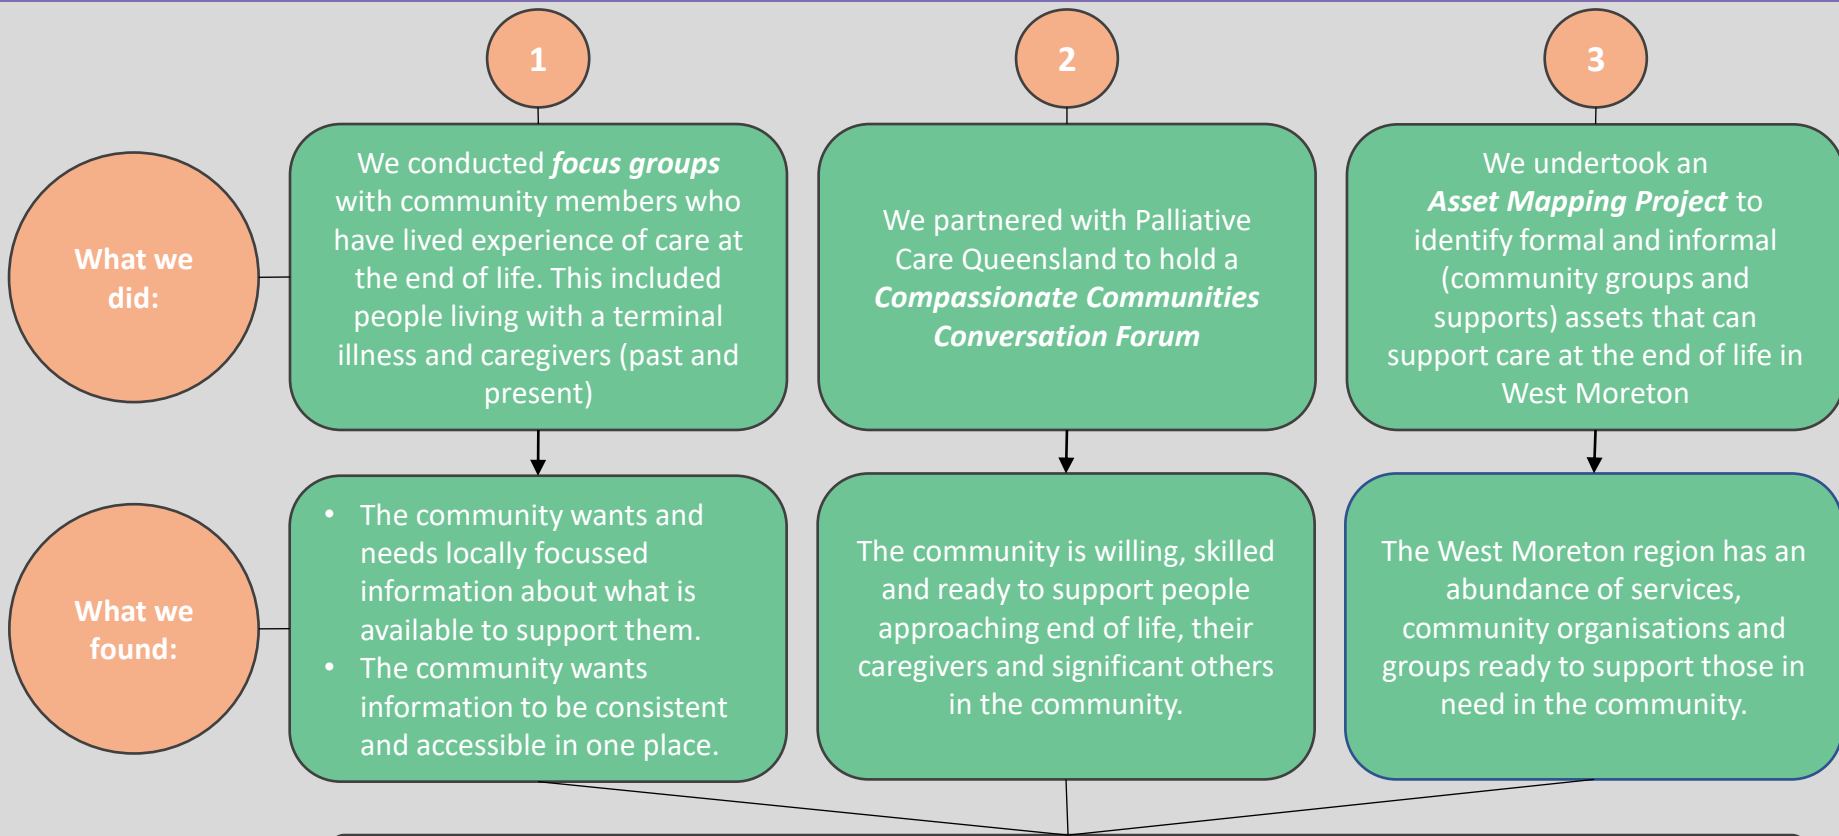

What is the Care at the End of Life Collaborative?

Established in 2018, we are a group of stakeholders in the West Moreton region of Queensland who are passionate and committed to improving care for those who are approaching the end of life in our community. Our members include community representatives, local government, peak bodies, and representatives from across the health and social care spectrum from primary to tertiary care, non-government, government and private organisations.

What is our purpose?

The Care at the End of Life Collaborative identifies and addresses gaps in care and support in the West Moreton community for those approaching the end of life. We do this through the development and implementation of an Action Plan, created and agreed by the Care at the End of Life Collaborative.
